

HOW TO RUN

1. Database Setup

A. Create Databases

```
CREATE DATABASE auth_db;
```

```
CREATE DATABASE erp_db;
```

2. Configure DB Connection

Open:

```
src/edu/univ/erp/data/DBConnection.java
```

Update your MySQL credentials:

```
private static final String USER = "root";
```

```
private static final String PASS = "your_password";
```

Ensure URLs match your database names:

```
jdbc:mysql://localhost:3306/auth_db
```

```
jdbc:mysql://localhost:3306/erp_db
```

3. Running the Application

1. Open project in your IDE
2. Run: Run Java
3. LoginApp.java

The login window will appear.

4. Sample Credentials

Role	Username	Password
Admin	admin2	admin123
Instructor	profdavid	david
Student 1	aryan	yo
Student 2	krishna	yo

5. Role Capabilities

- Admin: create users, courses, sections; toggle maintenance mode
 - Instructor: view sections, enter scores, compute grades, export CSV
 - Student: browse catalogue, register, drop (before deadline), view timetable/grades, export CSV
-

6. Maintenance Mode Behaviour

When Maintenance Mode = ON:

- Students cannot register/drop
- Instructors cannot enter/edit scores
- Admin is fully functional
- All users see a blinking maintenance banner
- CSV export remains allowed (read-only)
